Programme Overview

End Point Assessment (EPA)

After a minimum of 372 days and successful delivery of the programme, the end point assessment will take place. The end-point assessment is a synoptic assessment of the skills, behaviours and knowledge that have been developed throughout the apprenticeship.

The End Point Assessment for this standard is made up of two assessment methods:

- **Knowledge and Behaviours Test - Weighting 50%**

Apprentices will participate in a knowledge test that will cover the learning outcomes of the apprenticeship. This will consist of structured short answer and scenario based questions and will be taken under exam conditions.

- **Practical Assessment - Weighting 50%**

Apprentices will be observed by an independent assessor carrying out their everyday tasks. The apprentice will demonstrate full competence in the necessary skills required for a Warehouse Operative. The assessor will ask questions or use simulated scenarios to collect any evidence they have not been able to gather over the course of the assessment.
